

# HYDRAULIC BLOCKS

CETOP3 (NG6) to CETOP 8 (NG25)

**ACTIONHYDRO**

HYDRAULIC PUMPS, MOTORS AND COMPONENTS

MECABOR manifolds have a well-established reputation for quality within the hydraulic industry, with production dating back to the 1970s. As of 2022, Action Hydro BV holds the exclusive rights for manufacturing MECABOR manifolds. Our production capabilities hold a range of standard products as well as customised manifolds tailored to individual customer requirements. Additionally, we maintain stock of the most common blocks in both cast iron (GGG) and aluminium materials.

## Design Expertise

At Action Hydro B.V., we specialise in hydraulic manifolds and are here to assist you. If you require a solution that isn't covered by our standard offerings, please get in touch with your specific requirements, and we'll design a custom-made hydraulic manifold for your needs.

## Applications

Our manifold can be found in the following fields:

- **Industrial Applications**

Such as presses, machine-tools, the steel industry, wind power, and many more.

- **Mobile Equipment**

Including agricultural machinery, lifting and hoisting equipment, public works vehicles, mining machinery, and many more.

**High quality manifold blocks are made in cast iron and aluminum variants for maximum performance. These manifold blocks are used in both stationary and mobile hydraulic systems all over the world.**

Our Mecabor manifolds come with a Zinc Nickel treatment and are available in different sizes and have multiple options.

### Available sizes

CETOP 3 / NG6  
CETOP 5 / NG10  
CETOP 7 / NG16  
CETOP 8 / NG25

### Options

Multiple stations  
Cavity/C10-2  
Side ports  
Bottom ports  
Pressure test points on A and B
